

Sample Panel of Green Tropics Artificial Vertical Garden (Small Sample) Commercial Grade UV Resistant

Size	10 x 10 x 3 Inch
Weight	2 lbs
Usage	Indoor & Outdoor
Installation Method	Panels clip together to make any size. Excess can be cut with scissors. Attached via screwing directly to a wall. Guide can be viewed here for more details.
Technology	UVTex & RealTex

Order yourself one or many artificial vertical garden samples to check out in person just how amazing they look. This sample listing is 1 small sample piece only (not a full panel), samples typically measure around 10inch x 10inch. Due to the lush nature of our vertical garden panels, sample squares will not always reflect the full variation of the panel as plants do vary.

The Green Tropics Artificial Vertical Garden is a perfect accent to your home, office, or any other gathering place. This high-quality faux plant wall is made of 100% recycled materials and brilliantly designed for easy installation on almost any vertical surface. Its ultra-realistic and dense evergreen foliage will make you believe that you're in a luxurious tropical paradise.

The most satisfying DIY project

Our living wall panels are fitted with a snap & lock system so you can easily build a wall of your desired size. You can also trim the panels into any shape for that perfect fit.

Designer Plants' faux vertical garden walls are amazing to liven up:

- Patios and balconies
- Gazebos
- Reception areas
- Boring, monotonous hallways
- Living rooms and bedrooms
- Libraries
- Car parks
- Common areas like office break rooms and bathrooms

You can also use them to line your backyard fence. That way, you can block out any nosy neighbors while adding elegance and serenity to your home. Now that's a truly private getaway!

The artificial vertical garden with long-lasting color

All wall panels are treated with UV protection directly inside the leaves, ensuring that your green plant wall art stays green for a long, long time. We offer a guarantee of 5 years, though we can tell you that our vibrant vertical gardens last much longer than that.

No need for endless pruning and trimming

Real plants may smell great and make the air fresher, but they're also a huge pain to maintain. The endless watering, trimming, sweeping up dead leaves, pulling out weeds, spraying insecticide, heaping on fertilizer - it all just gets too tedious at some point.

With our lifelike artificial greenery, you'll do none of that work! All you have to do is make sure it's installed properly, dust it once in a while, and maybe tie back a few leaves if it's really windy where you live. Other than that - your faux vertical garden is set for life.

We are an environmentally-conscious brand

We believe in minimizing our carbon footprint. Living plants may seem like a more eco-friendly choice at first, but our artificial vertical gardens only emit 20% of the total overall emissions of a living garden. This is because they require very little equipment to install and need almost zero maintenance.

All our fake plants are certified ISO, REACH, and ROHS compliant. They're all thoughtfully made without any harmful chemicals.
