Order yourself one or many artificial vertical garden samples to check out in person just how amazing they look. This sample listing is 1 small sample piece only (not a full panel), samples typically measure around 10inch x 10inch. Due to the lush nature of our vertical garden panels, sample squares will not always reflect the full variation of the panel plants do vary.

Whether it be your home, office, cafe, or venue, the Lush Fern Artificial Green Wall is easy to install and requires practically zero maintenance. It's made without harsh chemicals, making it safe for you and your entire family. But how long will the green leaves last? No need to worry! These faux living walls are treated with UV protection directly in the leaves to prevent them from fading in the sun. Your green grass wall will stay vibrant for years to come.

Quick and easy DIY installation

Your artificial living wall is designed for a no-fuss setup. Its durable grid backing has a unique snap & lock system, allowing you to connect multiple panels for a custom design. You can also trim away some edges to make sure that your DIY living wall fits any space perfectly.

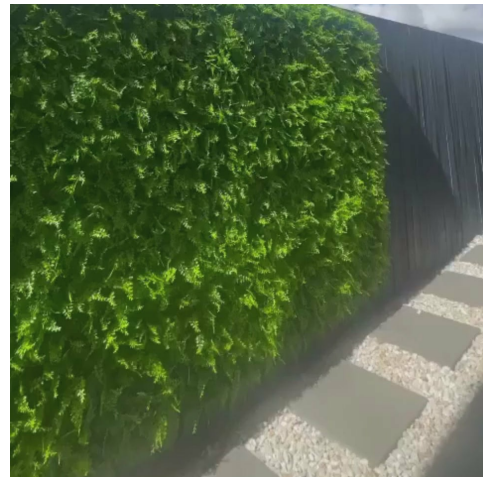

A green grass wall makes a lovely accent for:

- driveways
- gardens and gazebos
- patios
- kitchens and dining areas
- bare, dull outer walls
- wooden fences
- hallways
- balconies

A subtle yet effective security feature

A house isn't just a place to sleep, it's your own private space to relax and be yourself. We know how annoying it can be to have nosy neighbors or creepy strangers peeking over your fences. The good news is our fake living walls don't just add color and texture to your walls, they also add an extra layer of privacy.

Use your fake plant wall decor as an elegant privacy screen by installing it a bit higher than your fence is. With these dense, sturdy leaves, they won't be able to see a thing. That'll keep them out of your hair!

Almost zero maintenance required

Real gardens are a wonderful sight and they smell great, too! But don't they require a ton of work? Here are just some of the things you **DON'T** need to do with a faux grass wall:

- Water it daily
- Trim, shape, and prune it
- Feed it fertilizer-rich soil
- Spray pesticide
- Check it for weeds
- Sweep up its fallen leaves
- Stress about it constantly

Your artificial living wall stays where you put it up rain or shine (or snow), leaving you to work, play, or lounge around as you please.

Better for the environment

Just the fact that you won't spend gallons of water on your home garden is sure to be a plus in Mother Nature's book. Your fake living wall also emits 20% less carbon than its living counterpart. Without the need for fertilizer, soil replacement, and other maintenance activities, you'll be doing the earth a favor by sticking to our evergreen artificial living wall panels.
