

Set of 3 Bulk Eco Home Safe Artificial Plant Cleaner – 33.8 fl oz / 1L (Bulk Savings - Total 101.4 fl oz / 3 L)

Quick links: [1-Year Warranty](#) [Installation Parts](#) [UV Protection Spray](#) [Why Designer Plants](#)

The Eco-Home Safe Artificial Plant Cleaner is the standard cleaning solution specified alongside every Designer Plants installation — formulated with natural essential oils to lift dust and environmental deposits from [RealTex™](#) and [UVTex™](#) leaf surfaces without damage.

This bulk set supplies three 33.8 fl oz (1 L) trigger-spray bottles — 101.4 fl oz (3 L) total — designed for ongoing maintenance of large green wall installations, multi-panel commercial fit-outs, trade-account stock, and homeowners with several Designer Plants pieces across the property. Significant saving versus three single-bottle purchases.

The single largest cause of premature artificial plant degradation is the use of harsh household cleaners that strip the UV inhibitor coating from the foliage. The Eco-Home Safe formula was developed specifically to clean artificial greenery without solvents, alcohol, or abrasive agents — preserving the coating that protects the product lifespan and warranty cover.

Specification	Detail
Format	Set of 3 × 33.8 fl oz (1 L) trigger-spray bottles
Total Volume	101.4 fl oz (3 L)
Formula	Natural essential oils — non-toxic, home-safe, ready to use (no dilution)
Application	Light mist + soft cloth wipe — do not soak or saturate
Coverage per Bottle	Approximately 50–80 sq ft per full clean (depending on dust load)

Specification	Detail
Suitable For	All Designer Plants artificial greenery — RealTex™, UVTex™, and FireTex™ ranges
UV Coating Safety	Engineered to preserve UV inhibitor coating — will not strip or degrade UVTex™
Ingredients	Aqua, plant-derived surfactants (coconut), aloe vera, sugar/corn alcohol, peppermint oil, lavender oil, organic coconut oil, organic lime, fragrance oil, plant-based chelating agent
Eco Profile	Grey-water friendly, biodegradable, never tested on animals
Origin	Made in Australia with natural essential oils
Set Shipping Weight	Approximately 6.6 lbs (3.0 kg)
Warranty	1-year warranty against product defect

Where This Cleaner Is Used

Large Green Wall and Vertical Garden Installations

Feature walls of 30 sq ft and above require periodic deep cleaning to maintain the visual depth of the foliage. The bulk set supplies enough cleaner for multiple full cleaning cycles of even the largest residential and commercial installations.

Hospitality and Commercial Maintenance Contracts

Specified by Designer Plants installation partners for ongoing maintenance contracts across hotels, restaurants, retail flagships, and corporate offices. The set format suits installers servicing multiple client locations.

Trade Accounts and Installer Stock

Trade-account holders and certified installers stock the bulk set for client maintenance visits and post-installation handover. Available at trade pricing — contact the team for distributor terms.

Outdoor UVTex™ Installations

Pool surrounds, courtyards, balconies, and outdoor commercial installations accumulate pollen, salt air, and airborne grit that standard hose rinsing alone does not fully remove. Periodic cleaning with the Eco-Home Safe formula restores the UVTex™ foliage to original condition without compromising the UV coating.

Directions for Use

Step 1 — Spot test. Apply a small amount to a hidden area of the foliage and check for any reaction before broader application.

Step 2 — Apply a light mist. Spray the foliage from 6 to 8 inches away. Do not soak or saturate the leaves.

Step 3 — Wipe clean. Use a soft cloth or paper towel in the direction of leaf growth. Repeat on stubborn dust or grime areas.

Step 4 — Outdoor pieces. A gentle rinse with clean water after wiping helps remove any residue from foliage exposed to pollen, salt air, or airborne grit.

Designer Plants takes no responsibility for damage caused by incorrect use of the product.

What Not to Use on Artificial Greenery

To preserve the lifespan and warranty cover of any Designer Plants product, avoid the following:

- **Alcohol-based sprays** — isopropyl alcohol, rubbing alcohol, methylated spirits, alcohol-based glass cleaners
- **Solvent-based cleaners** — acetone, mineral spirits, white spirit, paint thinner, carburetor cleaner
- **Bleach and chlorine-based cleaners** — diluted bleach, multi-purpose disinfectants, mildew removers
- **Ammonia-based cleaners** — window cleaners and glass cleaners containing ammonia
- **Abrasive scouring agents** — powders, cream cleansers, scouring pads, steel wool, stiff-bristle brushes
- **High-pressure water** — pressure washers and high-flow hose jets can dislodge UV coating and damage stem assemblies

Safety Information

Keep out of reach of children and pets. Use only as directed. Avoid contact with skin and eyes. Do not mix with other cleaning substances. If swallowed, immediately clear the mouth and contact **US Poison Control at 1-800-222-1222** for guidance. Flush affected skin or eye areas with clean water.

Why Designers and Commercial Operators Specify Designer Plants

Designer Plants holds a 5-star rating across more than 20,000 verified customer reviews and has delivered commercial-grade installations for clients including BMW, Disney, Aperol, Facebook, Coca-Cola, and Westfield, with installations across North American universities, ski lodges, and resorts. With over 55,000 clients worldwide, Designer Plants is a trusted name in premium ultra-realistic greenery. Trade pricing available. Contact the team on [+1 786 723 3309](tel:+17867233309) or sales@designerplants.com.

Maintenance Cadence

Light dusting every 4–6 weeks with a microfibre cloth or feather duster. Deep clean using the Eco-Home Safe Artificial Plant Cleaner every 3–6 months for indoor pieces, or every 2–4 months for outdoor installations exposed to pollen, salt, and airborne grit. Commercial venues with high foot traffic or food-service environments may need a more frequent cleaning cycle.
