- ✓ Instant Beautification & Results
- ✓ Extremely Dense & Lifelike in Appearance
- ✓ High-quality UV Engineered Boxwood Hedge
- ✓ Long-term Results

Boxwood hedges with super low maintenance

Unlike with real plants, you won't have to stress about fake boxwood hedges at all. There's no trimming or watering required, so you can spend your precious time and money on more important things. Here are just some of the activities you won't need to worry about with an artificial boxwood panel:

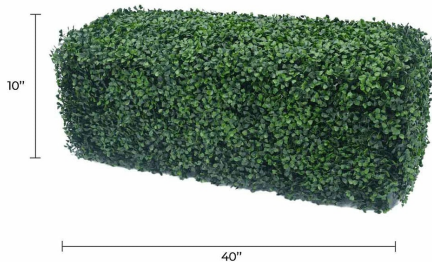

- Endless pruning, trimming, and shaping of your green gem boxwood
- Make sure it gets adequate sunlight
- Wilting leaves, especially in the colder months
- Hiring a gardener to take care of your plants when you're away
- Spending money on pesticides, fertilizers, and water

Each hedge comes flatpack and only takes 5 minutes to assemble - they are perfect as a garden edge or border and measure 40" long x 10" high and 10" wide + around 1" of foliage on all sides.

Well-built with UV-resistant engineering

These amazing artificial green plants are made with heavy-duty plastic that retains its shape for a lifetime. A lot you'll find on the market are cheaply made and may fade or crack after a few months of sun exposure. Not our plants! Each leaf is treated with our unique UV-protection technology, making sure that its vibrant green color lasts for a long, long time.

Even with its high-quality and sturdy materials, our boxwood artificial boxwood hedge walls are lightweight and ultra-portable. It's super easy to just move them around depending on your preference, making them the best and most versatile decor you'll ever have.

A subtle way to add privacy

A boxwood hedge can serve as a great privacy screen to keep out any prying eyes. You can install it in areas under renovation, along your patio or balcony, or right along your backyard fence. It looks great from the outside, but it subtly makes looking into your home much harder.

Safe for humans and for the earth

Our faux boxwood hedges are made with 100% recyclable materials that are free from harmful chemicals. We make sure that all our plants are ISO, REACH, and ROHS compliant so they're safe for you, the environment, your pets, and your entire family.

In fact, with all the water and resources you save with an artificial plant, you will actually produce 20% fewer carbon emissions than you would with a real plant. Now that's a win for the environment!
