

## **Giant Commercial and Luxury Monumental Coconut Palm Tree (13ft - 39ft) UV Resistant (10-12 Week Back Order)**

### **Monumental Artificial Palm Trees**

#### **For High-End Commercial & Luxury Residential Spaces**

Create an unforgettable architectural statement—indoors or outdoors—with our **monumental, large-scale artificial palm trees**, engineered for prestige environments where scale, realism, and longevity are non-negotiable.

Designed to rival the presence of mature, living palms—without irrigation, fallen fronds, or climate constraints—these towering palms are trusted by **resorts, theme parks, hotels, airports, mixed-use developments, and high-end private residences** worldwide.

These are not decorative accents.  
They are **structural landscape elements**.

### **Designed for Landmark Impact**

Perfectly suited for projects where visual authority and permanence matter most:

- Landmark entrances, boulevards & arrival zones
- Luxury resorts, hotels & entertainment precincts
- Airports, shopping centres & major public spaces
- Apartment complexes, podiums & rooftop terraces
- Statement residential landscapes, courtyards & estates

Available in **multiple impressive heights and canopy spreads**, allowing you to build the tropical environment you've always envisioned—without compromise.

## Engineered for Long-Term Outdoor Performance

- ✓ **UV-Engineered for Harsh Outdoor Conditions**
- ✓ **Ultra-Realistic Foliage & Trunk Construction**
- ✓ **Instantly Elevates Any Space with a Premium Tropical Presence**

Crafted using **advanced UVTEX® UV-stabilised materials**, these palms are designed to withstand prolonged sun exposure, fading, and weathering—whether installed outdoors or within expansive indoor environments.

Unlike standard artificial palms, every element—from **leaf density and form to trunk texture and colouration**—is engineered to perform convincingly at scale, even in open, high-traffic environments and when viewed up close.

## Designed for Impact. Engineered for Longevity.

Every palm tree is **handcrafted and made to order**, developed specifically for architects, developers, designers, and discerning homeowners who demand realism, scale, and structural integrity.

### Construction Highlights

- Dense, lush, natural-looking canopies
- Fibreglass trunks with **internal steel core** for structural strength
- Heavy-duty **steel base plate** for secure fixing
- Outdoor-grade finishes engineered for long-term exposure

These palms are built to **look right, stay right, and last**

## Modular, Serviceable & Cost-Effective Over Time

While the foliage is UV-engineered for long service life, the design allows for **individual leaf replacement** if required—rather than replacing the entire tree.

This modular approach:

- Reduces long-term ownership costs
- Minimises downtime
- Improves sustainability over the life of the installation

Leaves are supplied separately to protect them during transport and to allow **simple installation and future servicing**

## Important Information – Please Read Before Ordering

These trees are **bespoke architectural elements**, not off-the-shelf products. Please note:

- Artificial Palm Trees are **made to order** and not held in stock
- Production begins immediately upon order placement
- Delivery typically takes **12–16 weeks**, allowing for production, shipping, customs clearance & logistics
- Orders **cannot be cancelled or refunded** once production commences
- Each tree will vary slightly from images shown (minor colour and finish variations are normal)
- Images are for **inspiration and reference only**

If you have specific engineering, sizing, or compliance requirements, **please contact us prior to ordering**.

## Installation & Engineering Considerations

For safety, compliance, and long-term performance:

- Trees must be **professionally installed**
- Installation services are **not provided**
- Consultation with a **builder, engineer, surveyor, or concrete specialist** is strongly recommended
- Trees are supplied with a steel base plate for bolting or welding to a suitably engineered concrete pad

- Leaves are delivered separately and are **not pre-attached**
- Foliage is UV-stabilised and **can be manufactured to NFPA standards on request**

## **A Statement Piece Without Compromise**

Trusted in large-scale, high-profile installations worldwide, these artificial palm trees deliver **presence, prestige, and permanence**—without the risks, maintenance, or unpredictability of live palms.

Whether framing a landmark destination or elevating a private estate, this **tropical architecture done properly**.
