Backed with only the best quality metal, this classic black frame is weather-proof so you can install it anywhere without having to worry about rust. Its leaves are also UV-treated to ensure that they stay vibrantly green all year round. This ultra-lifelike artificial greenery is the best and most cost-effective way to add a touch of glamor to your area.

## Instant Beauty & Results

Plants need a lot of work. It isn't always easy to care for them if you have a hectic life. Here are a few things you won't need to do for our artificial living wall art:

- Water them daily
- Make sure they get enough sunlight
- Spray pesticides
- Put fertilizer in the soil to make sure they grow well
- Trim excess growths and pull out weeds
- Watch them wilt in the colder months
- Care for them constantly

With this superb green wall disc you won't have to worry about any ongoing work or costs.

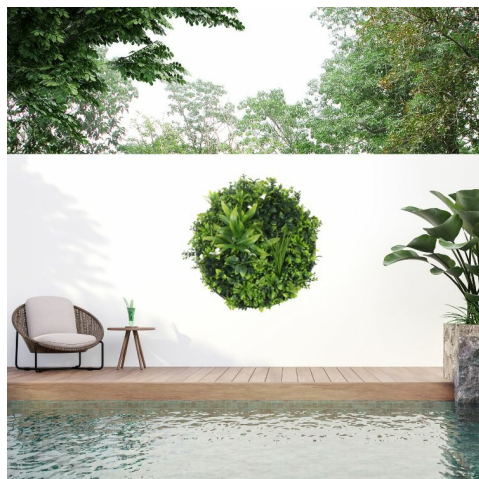

Measures 30" across, and can be easily hung from a U shaped hook or similar indoors or outdoors (if outdoors use a hook that grabs the full hanging bracket).

## Safe for Humans and for the Environment

Our green wall discs are manufactured with your health and safety in mind. They contain no harmful chemicals, including toxic heavy metals, that may have long-term effects on pets and humans.

All our artificial living plant wall decor is made with 100% recyclable materials, making them the best and most environmentally-friendly choice.

For your peace of mind, our artificial green plants are ISO, REACH, and ROHS compliant. That makes it so much safer even compared to real plants, which often need harmful pesticides to survive.

## Well-Built for Your Convenience

You won't just save time and money on maintenance, you also won't be needing a ton of equipment just to set up a living garden. Installing our faux plant living plant wall discs is super easy and requires very little equipment. It's just like putting up a picture or a painting on your wall.

We know how annoying it is when you buy something affordable and it falls apart almost instantly. That won't be the case for our plants. These faux living wall discs are made with powder-coated steel and PE plastic, a type of plastic renowned for its durability.

## Stunningly Lifelike and Vibrant Colors

Our fake wall discs are made to replicate real life as closely as possible. We use RealText technology for a long-lasting, lifelike finish on all our artificial plants.

Many artificial plants will fade after too much exposure to the sun, but our faux living wall panels and discs are treated to withstand the harmful UV rays. They come with a one-year guarantee against any fading or cracked leaves, allowing you to sit back and effortlessly enjoy the scenery.
